

Addams Family Polar Bear Installation

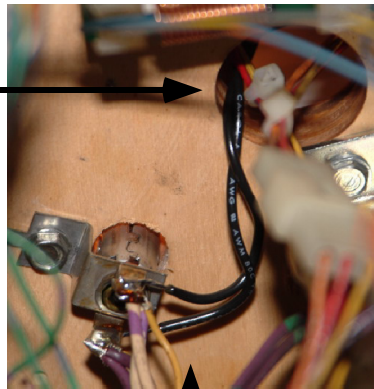

Wires goes down hole under ramp.

Black wires go under ramp.

Switch wire rides on top of game switch lever.

Mount Bear Bracket on two lower ramp screw locations with original or new screws.

Solder wires to the general illumination lamp or use the alligator leads and wire nuts to attach to the wires and clip on to the lamp socket

After assembly, turn on the game and adjust the wire lever switch so that it illuminates the bear when the ball rolls up the ramp. Adjust the switch operation by carefully bending the wire up or down slightly.
